

Step 1: register and create a profile

Click this button on the homepage to register and create a profile.

Your profile is your chance to tell people what you're interested in and why they should partner with you! It also means we can suggest suitable partnerships for you.

Step 2: search through the organisations

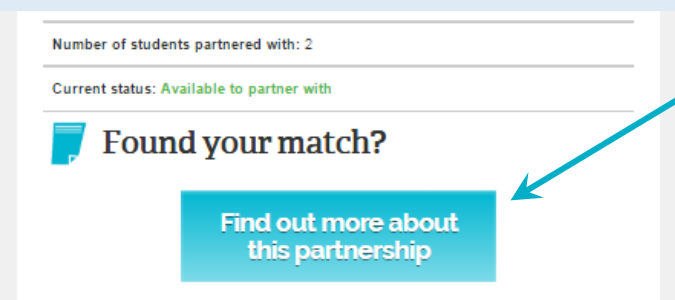

The 'Start searching' button takes you to the list of organisations.

You can search through the organisations using keywords or categories to find one with similar interests.

If you've created a profile, there will be suggested partnerships at the top of the page.

Step 3: find your match!

When you find an organisation that you'd like to discuss a project with, click the button at the bottom of their profile to find out more.

We will put you in touch with them and help you set up a successful partnership.
